Eurosensors'09 – Author Presentation Instructions

Registration

You are reminded that you must have one presenting author registered in order to have your contribution included in the conference program.

The registration page is here : http://www.eurosensors09.ch/registration.php

Presentation information – Lectures (non-invited papers)

Please check your presentation time to be sure of your allotted slot. The technical program is now available on the Eurosensors'09 web site at this address: http://www.eurosensors09.ch/technical-program.php

You will have 12 minutes to give your presentation, plus 3 minutes for a brief question-answer period. You are asked to be present <u>15 minutes before</u> the beginning of your session in order to coordinate with the session chair and to load your presentation on the available PC. The PC in the presentation room will be equipped with a basic MS Office 2007 software suite, a web browser and and internet connection. You will also be able to use your own laptop if you prefer (i.e. if your presentation includes material that requires non-standard plug-ins).

Presentation information – Posters

Please check your presentation time to be sure of your allotted slot. The technical program is now available on the Eurosensors'09 web site at this address: http://www.eurosensors09.ch/technical-program.php

You are required to be present in front of your poster during the dedicated poster sessions.

All poster sessions are to be held at the EPFL. Please hang your posters by 13h45 on Monday September 7, 2009 and leave them visible for the entire conference. You will find all necessary material for hanging your poster at a central station in the poster area. There will be staff available to assist you on Monday September 7, from 12:30-13:45.

You will have the equivalent space of an A0 poster at your disposal, in <u>portrait orientation</u> (height > width)

You may wish to use :

- a series of slides containing images/text
- a single A0 (or smaller) poster containing all relevant information.

You should use the format best suited to help you present your work when visitors pass by. Furthermore, the poster should also be able to serve as a stand-alone explanation for your work when you are not present at the poster station.

Please do not hesitate to contact us if you have any questions or concerns at: info@eurosensors09.ch

We thank you for your cooperation and are looking forward to an outstanding week of collaboration.

-The Eurosensors'09 Organizing Committee
